Part II, Section 4 - Animal health requirements

Country Greece **Year** 2024

Have you any data to report in this period ? Yes

4.1 Overall conclusion on the level of compliance achieved

In 2024, the main priorities of the official control plan regarding the animal health requirements were fulfilled and corrective actions were taken upon non compliances detected therein.

Overall, official control actions and activities, in conjunction with the issuance of Ministerial Decisions, updated manuals and related recommendations at the level of the Central Competent Authority have contributed to the effective function of the official control system in the field of animal health and in the activation of action plans for the correction of non-compliances.

Further, targeted national and union programmes on training and collaboration with competent authorities and bodies, as well as on programme management, were implemented.

The number of official controls was determined by the concurrent conditions and mainly by a) the lack of staff and resources, situation to be resolved with therecruitment of new staff (ongoing procedure) and b) the increased workload imposed on the competent authorities in the veterinary authorities of the Regions/RegionalUnits, due to the outbreaks of Peste de Petit Ruminantes, Sheep Pox and Goat Pox, Bluetongue and African Swine Fever.
